

Malta Window Fastener with Helix Seal™

ASSA ABLOY

The global leader in
door opening solutions

The Malta Window Fastener incorporates the patented Helix Seal™ cam action for ease of operation. The integrated tongue shield protects the window frame against marking when opening and closing, while providing enhanced window seal compression on closing.

This fastener blends seamlessly with the full range of Malta furniture, to create a modern and consistent look. It can be used on either aluminium or uPVC, casement or awning windows.

Features

- Helix Seal™ patented 90° cam action
- Enhanced seal compression without the need of a flap or wedge
- Tongue shield with chamfered edge to protect the window frame
- High quality pressure die-cast components with colour matched tongue shield
- Face fixing
- Concealed fixing
- Quality friction joint providing tested and proven durability

Options

- Left and right handed models
- Available in a wide range of powder coat colours or satin chrome finish

PATENTED TECHNOLOGY

HELIX SEAL

Malta Window Fastener with Helix Seal™

The low profile design is suited to bypass situations, where a sliding door would pass in front of a window.

The high profile fastener has an ergonomic design and allows for more finger room for easier opening and closing.

The double tongue fastener allows controlled ventilation especially in windy conditions.
